

Why is the public being asked to use three separate bins?

#3 through #7 plastic will not be collected curbside. Bring these plastics to the Drop-off at 901 Patterson Drive

We are pleased to now offer you #3 through #7 plastic recycling, but your help is needed to make this collection successful. We are asking that #1 PET plastic bottles & #2 HDPE plastic still be separated into the proper bins.

It is important to check for the recycling symbol with the number inside to know what bin to place your plastic in.

Not all plastic is recyclable, We do not take plastic packaging from toys even with the proper number. Large bulky plastic items such as furniture is not allowed. No plastic bags or Styrofoam.

Plastic Recycling Program

Bloomsburg Recycling Center

The Bloomsburg Recycling Center is expanding plastic recycling and asking YOU to place #1 plastics in one bin, #2 in a separate bin and #3 - #7 in a third bin.

How do I know what number it is?

On most plastic jars, containers and other packaging of products you buy, you'll find a recycling logo with a number in the middle and sometimes letters underneath stamped into the plastic.

The Society of the Plastics Industry (SPI)

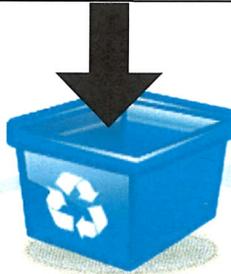

implemented the system in 1988 to allow recyclers to be able to tell the different types of plastics when sorting. Basically, the numbers in the triangle indicate the grade of plastic - the resin ID code.

If you have questions please call Bloomsburg Recycling Center at (570)784-4532.

PET, PETE
Polyethylene Terephthalate

Water Bottles • Soft Drinks • Sports Drinks
Peanut Butter Containers • Salad Dressing
Condiments • Vegetable Oil Containers

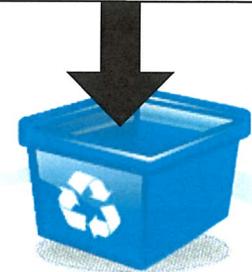

PLEASE REMOVE BOTTLE CAPS AND PLACE IN THE #3 - #7 BIN
